

Electronic poster format

1) It will be presented in Power Point 2000XP or 2007, having to save the file as PPT extension with a size no larger than 2 MB.

2) The size of the presentation template should be 21 cm wide by 32 cm long. In the upper right corner, the assigned poster number must appear. The typography must be Tahoma or Arial, of greater size for title (that must be in capital letters and smaller for the text).

In the presentation of posters, the first time must write the complete word, then and in parenthesis, the abbreviation of the same, which can be used later in the text.

3) The bibliography will be put to the end of the work (as in the design of the template), numbered according to the appearance in the text, placing each reference in line different.

Each reference must mention: Last name of the author (s) (up to 6 authors and liego et al.), Initial (s), of the name. Work title. Name of Journal (abbreviated according to Index Medicus), year of publication; volume number: number of the first-number of the last page. Website if not published through the site, in addition to the detailed for a publication, write obtained URL and date of access.

4) It is recommended to take into account the background color of the template and the letters with the contrast for an optimal visualization in the template.

5) You can insert: tables, figures, videos (MPG format 1,2,3 or 4, DIVX, AVI, Quick Time or Windows Media) in order not to lose the sound quality.

6) QR codes or augmentation techniques are not allowed.

7) 42-inch plasma in vertical orientation will be presented in Congress

8) The poster submitter must be registered with the Congress and must be present 10 minutes before the time allotted by the Committee. If it does not present itself and it does not have a
