

Pediatrics Workshop

General objectives:

The workshop will be aimed at updating diagnostic, anesthetic and analgesic techniques in the pediatric anesthesia, promoting the use of current technology for such techniques. There will be discussions in small groups of clinical cases as a methodology of work and learning, as well as teamwork.

Specific objectives:

Once the workshop ends, the participant will be able to make use of the information received in the management of a total intravenous anesthesia, a balanced anesthesia in his practice of pediatric. The participant will acquire the skills for the usage of new ventilation modes, the use of ultrasound for regional analgesia and other uses of the ultrasound in a pediatric patient. He will also obtain up-to-date knowledge for the management of perioperative analgesia and will be able to use and interpret the monitors of the depth of anesthesia.

Stations:

1. TIVA and General Anesthesia Based on Analgesia. Anesthetic Depth Monitoring
2. Perioperative regional analgesia echocardiography
3. New Ventilation Modes
4. Other Perioperative Uses of Ultrasound
