

## Workshop Total Intravenous Anesthesia - TIVA, TIVA simulation

### General objectives:

It is oriented to the learning of current practices of total intravenous anesthesia, knowledge of hysteresis and inertia in propofol, hyperalgesia and acute opioid tolerance among other aspects. We will work with infusion devices, simulators and monitoring.

### Specific objectives:

Once the workshop ends, the participant will acquire knowledge and will be able to perform a total intravenous anesthesia, indicating and elaborating a plan according to the different scenarios that he may have in his usual clinical practice.
